What is child abuse and neglect?

Child abuse isn't just about black eyes. While physical abuse is shocking due to the marks it leaves, not all signs of child abuse are as obvious. Ignoring a child's needs, putting them in unsupervised, dangerous situations, exposing them to sexual situations, or making them feel worthless or stupid are also forms of child abuse and neglect—and they can leave deep, lasting scars on kids. Regardless of the type of abuse, the result is serious emotional harm. But there is help available. If you suspect a child is suffering from abuse or neglect, it's important to speak out. By catching the problem as early as possible, both the child and the abuser can get the help they need.

Happy Birthday to Huxley Ye (June 01), Aiden (26), Simon Jasper (June 30)

- **Preschool Room:** Our Preschoolers are very interested in watching insects and bugs from the playground or park. So the children will explore the insects and crawly fiends in June. The children will participate in many activities such as painting, art and craft, songs and stories about insects and bugs, and the children will be spending as much outdoor time they can.
- **Toddler Room:** We chose a theme "Farm Animals". Learning about animals for Toddlers is interesting for them. They will learn, like sharing carrots with bunny, sensory activity (taste) cow milk, (touch) feather vs hair or fur, art and craft etc
